Summary

I'm a Product designer who ships code. **5+ years designing B2B, AI, and fintech products,** most recently agent observability, simulation, and prompt tooling for developer teams. I design in Figma and build in React, TypeScript, and Tailwind,

Experience

Respan AI / Consultant - Design Engineer — Aug 2026 – Present

- Shipped **agent simulation for prompts**, letting teams test prompt behavior against simulated scenarios before deployment; designed a new component for the scenario detail page.
- Designed **PII redaction workflows** that scale across regulated industries such as healthcare and finance, accounting for domain-specific sensitive data types.

FutureAGI / Product Designer II — Dec 2024 – Apr 2026

- Designed a **scenario-based agent simulation for chat and voice agents**, which helped dev teams reduce pre-production testing and iteration time by **50%**.
- Built a **workbench with comparison**, adopted by 150+ users for **2,000+ experiments** in the first month.
- Worked on sequential **prompt chaining for agent orchestration**, enabling developers to build and iterate **3**× faster.
- Worked on existing agent observability to create **trace-level debugging, session views, and analytics dashboards** that reduced to identify production issues from hours to minutes.
- Designed a **Knowledge Base feature** enabling users to sync external tools, upload documents, and generate synthetic datasets for agent evaluation and training.

Rigi / Product Designer — May 2024 – Aug 2024

- Designed live engagement tools (quizzes, polls, QA) to deepen subscriber interaction.
- Established a unified design system, driving a complete platform revamp and UI consistency.

FlyFin AI / Product Designer — Apr 2023 – Apr 2024

- Redesigned membership subscription experience with pricing and value-based messaging, driving **17% QoQ growth.**
- Created Tax IQ, a gamified tax education flow **80% engagement increase**: during tax season, with 40% retention
- Led end-to-end design of **Ask AI, an AI tax assistant for self-serve query resolution**, reducing support tickets 40%.
- Built a scalable design system for the Webapp.

The Good Glamm Group / Product Designer — Mar 2022 – Apr 2023

- Led design of **The Good Creator Co. SaaS: campaign platform**, driving a 15% increase in conversions.
- PopXO redesign: **reduced bounce rate from 70% to 35%,** time-on-site grew from **50s to 1.2 mins** through detailed audits and collaboration with PMs.
- Collaborated across pods on **ScoopWhoop, MissMalini, and BabyChakra**, contributed to gamified campaigns.

Skills

Design	Product design, UX research, interaction design, prototyping, design systems, information architecture, wireframing, vibe-coding, HTML, CSS
Tools	Figma, Figma Make, Claude Code, Vs Code, Framer, Notion, Miro, Vercel, Supabase, Lovable
Domains	AI tooling, developer platforms, B2B SaaS, fintech, mobile commerce, 0→1 product

Education

Seth G.S. Medical College and KEM Hospital / Bachelor of Health Sciences — 2017 – 2022
